# Pure Sunshine

Cheerful and full of zest, a pop of this color is sure to put some pep in your step BY TORI MELLOTT

**| Our inspiration** Promise of spring! This smile-inducing color makes everything it touches look and feel happy.

**| Where to use it** Yellow can be used almost anywhere in the house—and is perfect outside on porches and patios.

**| How to use it** Durable outdoor fabrics work beautifully as upholstery for family rooms and dining areas

(think pets and children). Yellow is a vibrant accent for blues and can crisply be paired with white.

**| Why it works** Because yellows range from playful brights to more serious golden tones, pairing them with similarly toned colors is a no-brainer.

**| Pitfalls** Avoid using bright yellow in large rooms, but employ muddier hues like goldenrod or sulphur in expansive spaces.

**| Summer Storage**
